# LED Flush Mount

START FROM HERE

• Make sure **POWER** is **COMPLETELY OFF** at the fuse box
• Have your fixture installed by a qualified licensed electrician
• Prepare everything in a clear area
• Wear gloves at all time during this installation
• Read instructions carefully before you start assembly
• Keep this installation sheet for future reference

Technical Support: 1-855-855-8926

Please Note:
• All Kuzco LED fixtures come with pre-wired LED module(s).
• Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
• For dimming, an ELV (Electronic Low Voltage) type of dimmer is required.

1. Remove the fixture from its original packaging. Next, remove the mounting plate **(1c)** from within the canopy **(2a)** by un-threading the screws **(2b)**. Attach the mounting plate **(1c)** to the electrical junction box **(1a)** by using the two screws **(1e)** provided in the hardware package. Make sure to reinforce the wood behind the ceiling and use the wood screws and plastic anchors **(1d)** provided.

2. You are now ready to mount the canopy. First connect all wires correctly black to black "L", white to white "N" and the ground wire with provided marrets **(1b)** from the hardware package. Align the canopy **(2a)** to the mounting plate **(1c)** up against the ceiling. Secure the canopy by using the screws **(2b)** provided.

3. You have now completed the installation of your fixture, enjoy.
